Mental Health Warning Signs

Mental health issues are common, but they don't always look the way we expect. Understanding the early signs can help you better support colleagues or recognize when you might need a break yourself.

Changes in Relationship to Work

- Difficulty completing normally easy tasks
- Increased perfectionism
- Taking much longer on tasks
- Paralysis in decision-making
- Compulsive email checking, even off hours
- Reluctance to take vacations
- Sending work emails at odd hours

Changes in Mood and Behavior

- Persistent low mood
- Loss of interest in activities
- Increased irritability or anger
- Rudeness toward colleagues

Substance Use

- Increased use of alcohol or other substances, including at work events

Physical and Lifestyle Changes

- Eating more or less
- Sleeping more or less
- Stopping or overdoing exercise
- Neglecting hygiene
